WINTER SPORTS

The School

King's Hall stands in one of the finest parts of the Province of Quebec, and the grounds are at an elevation of nearly ten hundred feet above the sea level.

A magnificent view of the surrounding country is obtained from every part of the building—and the bracing air of the district is a great factor in the development of the pupils.

The property comprises sixty acres. There are three tennis courts, and a hockey and baseball ground, and ice slide and an out-door skating rink.

There is a fine gymnasium where girls play basket ball and badminton in winter.

The School has its own farm, which is maintained entirely for the upkeep of the house, and from which an ample supply of absolutely pure milk is obtained from a certified herd.

The private water supply is two-fold, coming from a spring and artesian well, the waters of which have been submitted for analysis to the Public Health authorities and certified by them as being pure.

The building is heated throughout with hot water, lighted with electricity, fitted with all the modern sanitary arrangements and provided with most adequate fire escapes from each floor.

Each girl has separate sleeping accommodation.

The girls are taught to employ their leisure time well, and devote some of it to reading in the reference library, art work in the Studio, play-acting, etc.

THE LOUNGE

The School is divided into three sections, or "houses," each under the leadership of senior girls, and they compete with each other for a work and sports shield.

There is a Company of Girl Guides in the School, under the leadership of a Captain and two Lieutenants.

Each girl is responsible for the care of her wardrobe, and the artistic and neat arrangement of her room, under the supervision of a matron.

The Gymnasium is equipped with the most modern apparatus, and there is a resident mistress for Physical Culture and Games.

There is a resident trained nurse, who has charge of the health of the pupils, and a section of the house is set apart for this purpose.

"The Cottage", which is situated at some distance from the school buildings, is kept ready for immediate use in case of emergency or serious illness.
